

Thoshith G R

Site Reliability Engineer (L1/L2)

Bengaluru, Karnataka, India thoshithgr@gmail.com +91 84533 47763 linkedin.com/in/thoshithgr18

SUMMARY

Site Reliability Engineer with 4+ years at Tricog Health, having grown from a System Administrator role into cloud-native SRE work covering Kubernetes, AWS, CI/CD, and observability (Grafana, Prometheus). Experienced in production incident response, postmortems, and automating operational toil. Strong foundation in traditional infrastructure (Windows Server/AD, virtualization, networking) underneath a modern cloud/Kubernetes skill set, with the ability to own reliability end-to-end — from monitoring and alerting through root-cause analysis and cross-team collaboration.

SKILLS

Cloud & Infra	AWS (EC2, S3, RDS, CloudWatch, IAM), Kubernetes, Docker, Terraform, Ansible
Observability & CI/CD	Grafana, Prometheus, CI/CD pipelines, incident response & postmortems
Prior IT Foundation	Windows Server, Active Directory, Azure AD, VMware ESXi, networking (VPN, firewall, DNS/DHCP)
Tools	Git, GitHub, Nginx, Helm

EXPERIENCE

SRE Engineer (L1/L2) Oct 2025 – Present

Tricog Health Services · Bengaluru, India

- Monitor production systems and respond to incidents (L1/L2), keeping uptime high and downtime minimal
- Manage and troubleshoot Kubernetes clusters — pod health, deployments, scaling, resource optimization
- Debug application and infrastructure issues across Kubernetes workloads and AWS services
- Support CI/CD pipelines for reliable, fast deployments
- Build and maintain the observability stack (Grafana, Prometheus) for proactive alerting
- Operate AWS infrastructure: EC2, S3, RDS, CloudWatch, IAM
- Collaborate with development teams on incident postmortems and reliability improvements
- Automate repetitive operational tasks to reduce toil

System Administrator Sep 2022 – Sep 2025

Tricog Health Services · Bengaluru, India

- Managed enterprise IT infrastructure: Windows Server (Active Directory, DNS, DHCP, GPO)
- Administered virtualized environments using VMware ESXi and Workstation
- Provided L1/L2 support for system issues, user access, endpoint security, and SaaS tools (O365, Zoom)
- Configured and maintained user accounts and access controls via Active Directory and Azure AD
- Performed system monitoring, patch management, and backup/restore operations
- Supported network infrastructure: routers, switches, VPN, and firewall configuration
- Self-taught AWS, Azure, Docker, Kubernetes, and Git during this role, leading directly to the promotion into SRE

EDUCATION

B.Sc, Mathematics — Shree Siddaganga College 2018 – 2021
